alvar aalto 1898 1976 is finland s internationally best known architect and designer the exhibition catalogue art and the modern form examines his extensive personal connections the interplay between various forms of art in his work and the collaboration between aalto and his wife aino aalto who as designers strove to create a new aesthetic for everyday life the book also showcases art exhibitions organised by artek founded by aaltos maire gullichsen and nils gustav hahl in 1935 and the artworks that were purchased from these exhibitions by ateneum art museum the most prominent artists featured therein included hans arp lászló moholy nagy fernand léger and alexander calder exhibition finnish national gallery ateneum art museum helsinki finland 11 05 24 09 2017

## On the Philosophy of Central European Art

2003

in the personality of alvar aalto idealism and realism combined like the poles of a dynamo whose opposing forces form the source of its energy he was a creative artist and idealist for whom social and technical issues were also at the very core of his architectural oeuvre a significant but less known phase of aalto s life work occurred during and immediately after the 2nd world war the subsequent reconstruction period of finnish society the nation was in a state of crisis material and technical resources down to a minimum but aalto reacted to this situation energetically realistically and with a great deal of optimism developing innumerable projects from simple standard houstypes to large scale reconstruction and planning strategies the extreme circumstances following the aftermath of war forced people to re evaluate what was essential and necessary and to eliminate all excess an inventive mind might manage to create more from less the present state of the world is also in a situation which requires serious evaluation and balancing of values and resources this year s symposium is held in a climate of economic and social upheaval in rich industrial countries the consumer fling is over and the global balance is precarious to say the least we have chosen the title of the symposium to stress the need to discuss what should be the essence of the art and technique of building when all that one can afford are the basic essentials this discussion does not revolve around questions of architectural style but rather on the fundamental material and spiritual living conditions vital for our culture to survive and prosper alvar aalto s partner elissa aalto was a central figure in the organisation of all the symposiums since 1976 she took part actively also in the planning of this year s symposium until her death in spring 1994 foreword

arts universities have conducted supervised evaluated and analysed research based on artistic activity in the early days of this artistic research a question arose can a work or act of art itself be artistic research this question is a serious one that concerns our idea of research this also leads to a less serious issue that describes our relationship to art although art is an important part of life and although it delights and shocks us and makes our lives sweet and enjoyable it is never on a par with other human actions art is always individual and we can never be certain that it is indispensable even to the artist in question who says that art is not just a mistake the joke of a lifetime or an indiscretion a human skill is never predictable firm or steady artistic research is a young open discipline that is constantly leading to new discoveries it is based on artists professional skills and on methods that have so far been applied in practice but not considered in theory with juha varto's book we are taking a step forward to add theory to practice but we are not adding just any theory

## **Art and Alvar Aalto**

1984

one of the most important architects of the 20th century alvar aalto is responsible for creating the minimalist scandinavian style which dominates much of contemporary design this

book profiles his most important projects including the Finlandia Hall in Helsinki and the Church of Three Crosses in Imatra, Finland.

## Alvar Aalto

1994

Der Architekt und Designer Alvar Aalto (1898–1976) war einer der wichtigsten Vertreter organischer Gestaltung im 20. Jahrhundert. Seine Architektur fasziniert bis heute durch natürliche Materialien und skulpturale, geschwungene Formen. Für das Sanatorium in Paimio entwarf Aalto 1932 den ersten Freischwinger aus Holz. Seine Savoy Vase (1936) gilt heute als das Symbol finnischen Designs. Schlechthin die Ausstellung gibt einen umfassenden Einblick in das Werk Aaltos. Präsentiert seine wichtigsten Bauten, Möbeln und Leuchten und geht den Inspirationen nach, die sein Werk prägten. Schlüsselthemen sind Aaltos Dialog mit wichtigen Künstlern wie Hans Arp, Alexander Calder oder Laszlo Moholy-Nagy. Seine intensiven internationalen Verbindungen, seine Auseinandersetzung mit Fragen des rationalen Bauens, aber auch seine Suche nach einer Gestaltung, die stets den Menschen in den Mittelpunkt stellt.

Exhibition: Vitra Design Museum, Weil am Rhein, Germany, 27.09.2014 – 03.01.2015

## Architecture of the Essential

2023-05-25

First Faq is the first volume of a collection of critical contemporary feminist and queer scholarship emerging from the Department of Art at Aalto University, with contributions from Finnish and international students. Among others, the book advocates for non-normative educational, artistic, and cultural approaches that explore largely silenced issues. The texts emerge from personal experiences but address systemic discrimination embedded within broad institutional and political structures.

## Unfolding the Public Art at Aalto University

2017

Alvar Aalto was remarkably inventive in architecture and industrial design. Moreover, his command of technology was integrated with a humanistic style of building. Like Saarinen and Frank Lloyd Wright, he sought an organic synthesis of his structures with their surroundings. Aalto's success in approaching these ideals may account for the extraordinary spread of his influence on an international scale. In this broad study of Aalto's work, Malcolm Quantrill assesses its development in terms of two powerful sources: the Finnish National Romantic Movement and the Modern Movement in Architecture. His critique of Aalto's most significant buildings and furniture designs is complemented by photographs of many stages of their creation, from the spontaneity of initial sketches to the completed detail. Professor Quantrill first met Alvar and Elissa Aalto at Muuratsalo in June 1953, and he has been studying and photographing Aalto's buildings ever since. His book provides striking insights into the work of one of the greatest architects of the century.

this book concentrates on the deep historical political and institutional relationships between art education and excess going beyond field specific discourses of art history art criticism philosophy and aesthetics it explores how the concept of excess has been important and enduring from antiquity through contemporary art and from early film through the newer interactive media examples considered throughout the book focus on disgust grandiosity sex violence horror disfigurement endurance shock abundance and emptiness and frames them all within an educational context together they provide theories and classificatory systems historical and political interpretations of art and excess examples of popular culture and suggestions for the future of educational practice

## Art as We Don't Know it

2018

chilean artist ariel bustamante is known for works that break down traditional notions of sound art in his projects and research bustamante concentrates on finding strategies to understand physical and cognitive aspects of sound in this way both architectural and sculptural features are present in his art most projects also include elements of media technology and science ariel bustamante was chosen in an international open call to aalto university s artist in residence programme at the school of arts design and architecture his residency was from 2014 until 2015

## Artistic research

2004

alvar aalto once argued that what mattered in architecture wasn t what a building looks like on the day it opens but what it is like to live inside it thirty years later in this book architect and critic robert mccarter persuasively argues that interior spatial experience is the necessary starting point for design and the quality of that experience is the only appropriate means of evaluating a work after it has been built mccarter reveals that we can t really know a piece of architecture without inhabiting its spaces and we need to counter our contemporary obsession with exterior views and forms with a renewed appreciation for interiors he explores how interior space has been integral to the development of modern architecture from the late 1800s to today and he examines how architects have engaged interior space and its experiences in their design processes fundamentally transforming traditional approaches to composition eloquently placing us within a host of interior spaces he opens up new ways of thinking about architecture and what its goals are and should be
