the time of carnival represents a wild time at the end of winter and pointing to the beginning of a new season it is characterized by the irruption of border figures animal masks characters which recall the world of the dead and which bring within themselves the germ of a vital force of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops this wild domain shows itself under the shapes of a contiguity between human and animal the costumes the masks refer to a world in which the characteristics of the human and those of the animal are fused and intertwined among these figures in particular emerge those of the wild man the human being who takes on animal like attributes and aspects and of the bear the animal that more than all the others gets as close as possible to the human and seems to reflect a deformed image of it such symbolic images come from far off times and places to tell a story that belongs to our common origins the bear assumes attributes and functions alike in very different cultural contexts such as the sámi of finland or north american hunter gatherers and represents a boundary between the world of nature and the human world between the domain of animals and the difficult construction of humanity a process continued for centuries perhaps millennia and which cannot still be said complete

in the second edition of the idea of nature in disney animation david whitley updates his 2008 book to reflect recent developments in disney and disney pixar animation such as the apocalyptic tale of earth s failed ecosystem wall e as whitley has shown and disney s newest films continue to demonstrate the messages animated films convey about the natural world are of crucial importance to their child viewers beginning with snow white whitley examines a wide range of disney s feature animations in which images of wild nature are central to the narrative he challenges the notion that the sentimentality of the disney aesthetic an oft criticized aspect of such films as bambi the jungle book pocahontas beauty and the beast and finding nemo necessarily prevents audiences from developing a critical awareness of contested environmental issues on the contrary even as the films communicate the central ideologies of the times in which they were produced they also express the ambiguities and tensions that underlie these dominant values in distinguishing among the effects produced by each film and revealing the diverse ways in which images of nature are mediated whitley urges us towards a more complex interpretation of the classic disney canon and makes an important contribution to our understanding of the role popular art plays in shaping the emotions and ideas that are central to contemporary experience
