Two-person Game Theory 1959 following on from his successful books *Understanding Chess Endgames* and *Understanding Chess Middlegames* John Nunn fleshes out the theory by showing how world champion Emanuel Lasker handled a wide variety of practical situations we see how Lasker's play which his opponents found so unfathomable was based on logic extreme pragmatism and a deep understanding of how chess players think covers topics not usually considered such as queenless middlegames and manoeuvring dissects strategic issues including piece activity pawn structure and bishop vs knight looks at psychological aspects of chess such as choosing lines which are most uncomfortable for the opponent discusses how to handle inferior positions explanations focus on general ideas rather than detailed analysis features more than 100 of the most instructive examples from Lasker's career concludes with a selection of exercises with full commentary and explanation Emanuel Lasker from Germany chess player mathematician and philosopher held the world title for 27 years longer than any other champion his victories against many of the all time greats were based on an ahead of his time understanding and had a subtle but profound influence on modern chess thinking

The Adventure of Chess 1947 the first section of this book discusses classical themes such as pawn majorities the centre and structural weaknesses Watson then moves on to discuss new concepts including the willingness of modern players to accept backward pawns in return for dynamic play the idea of a good bad bishop knights finding useful roles at the edge of the board and the exchange of sacrifice ideas that became prevalent with the post war Soviet world champions back cover

Lasker's Manual of Chess 2014-11-24 the beauty of a game of chess is usually appraised and with good reason according to the sacrifices it contains on principle we incline to rate a sacrificial game more highly than a positional game instinctively we place the moral value above the scientific we honor Capablanca but our hearts beat higher when Morphy's name is mentioned introduction

perhaps the strongest austrian born grandmaster of the 20th century rudolf spielmann 1883 1942 defeated such world class opponents as nimzovich tartakower bogoljubov and even the great capablanca among the reasons for his success was his mastery of the art of sacrifice in this ground breaking classic distilled from 40 years of tournament play he outlines the hard won lessons that enable a player to win games by giving up pieces drawing on dozens of his own games against such topflight players as schlechter tartakower bogoljubov reti rubinstein and tarrasch spielmann describes and analysis various type of sacrifices positional for gain mating and real sacrifices for development obstructive preventive line clearance vacating deflecting and more the result was the first systematic attempt to explain and exploit the theory of chess sacrifice it remains an extremely helpful and useful weapon in the arsenal of chess players at every level
