his death in london in 1940

Elementary Lessons, Being a Course of Instruction for the Deaf & Dumb

2019-05-07

the present work is designed to provide a carefully graded introduction to the grammar and
vocabulary of the gothic language the material is presented in a way that i have found very
effective in my teaching of other languages over the years with enough examples and exercise
material to lead the student to a rapid and intelligent reading of the extant texts in
addition to this purely practical goal i have also tried to clarify to the extent possible the
aspectual nature of the gothic verb a subject somewhat neglected in the textbooks currently
available in english because the study of gothic is usually undertaken by students of germanic
or indo european philology i have included a discussion of the historical phonology and
morphology in a supplementary series of lessons whose contents parallel that of the
corresponding lessons in the grammar the texts given include all extant portions of the four
gospels together with the extant portions of romans and first timothy the gospel according to
luke has been fully glossed at the foot of each page to spare the student the loss of time in
looking up words the end glossary contains the complete vocabulary of the gothic bible with
the exception of proper names and a few transliterated greek words from the preface

the lessons from antigua can be a set of guidelines they can encourage mutual respect responsible action and brotherly love among workers they are taken from more than forty years of experience in the trades and my involvement in the united states navy seabees the lessons hold topics that can be talked about in a team setting they include but are not limited to faith fighting freedom and resolution these topics are covered separately at times together and at times they overlap because life is like that one part will overlap another the purpose of lessons from antigua is to raise awareness on how different thought patterns and approaches to managing men will be met with a defined outcome it is not my intention to put down methods or management they got us where we are today and there are strong points in any or all methods there are however areas in any style that can be improved and that is where awareness is born neither is this an idealist approach to work because some men need to be led with a stick or fear of punishment and some respond better to a carrot or a reward a rare few just need a problem to solve to be motivated the emotionally intelligent part is determining when carrots are needed and when to put the stick away or how to use more carrots and less stick
