Data Structures & Algorithms Interview Questions You'll Most Likely Be Asked 2015 experienced interviewers provide winning answers to the most frequently asked job interview questions cover

Quick Placement Test 2006 choices are frequently made from lists where there is by necessity some ordering of options in such situations individuals can exhibit both primacy bias towards the first option and recency bias towards the last option we examine this phenomenon in a particularly interesting context consumer response to the ordering of economics papers in an email announcement issued by the national bureau of economic research nber each monday morning eastern standard time est the nber issues a new this week ntw email that lists all of the working papers that have been issued in the past week this email goes to more than 23 000 subscribers both inside and outside academia and the placement order is based on random factors we show that despite the randomized list placement papers that are listed first each week are about 30 more likely to be viewed downloaded and cited over the next two years lower ranking on the list leads to fewer views and downloads but not cites however there is also some recency bias with the last paper listed receiving more views downloads and cites the results are robust to a wide variety of specification checks and are present for both all viewers downloaders and for academic institutions in particular these results suggest that even among expert searchers list based searches can be manipulated by list placement
