Things to Make and Do in the Fourth Dimension 2014-12-02

mathematics made mouth watering things to make and do in the fourth dimension is an alternative math class how can math help you choose a second hand car why is a text message like a sudoku how much fun can you have with a barcode matt parker explains that math is difficult because it s one of the few subjects that requires us to train our brains to think in an entirely new way and to confront things with no direct analogy in everyday life imaginary numbers snowflakes that only exist in 196884 dimensions and objects beyond infinity and shows us why it s worth the effort starting with basic arithmetic and geometry things to make and do teaches us the math we never got to enjoy at school each chapter is structured around activities and thought experiments we are invited to make a calculator out of dominoes find out why wrapping oranges in plastic wrap is a good way to learn about higher dimensions and discover what soap bubbles have to teach us about calculus a series of incremental and hugely entertaining steps take us all the way from simple algebra to the most exotic and fascinating ideas in mathematics klein bottles higher dimensional topology and the many different species of infinity via unimaginably small pizza slices mobius strips and a thorough examination of the sausage conjecture this lively funny and deeply intelligent book teaches math in a fun interactive manner rather than by rote learning and exercises you ll not look at the number 37 the same way again and you just might take part in mobius strip craftwork

Things to Make and Do in the Fourth Dimension 2014-12-02

a book from the stand up mathematician that makes math fun again math is boring says the mathematician and comedian matt parker part of the problem may be the way the subject is taught but it s also true that we all to a greater or lesser extent find math difficult and counterintuitive this counterintuitiveness is actually part of the point argues parker the extraordinary thing about math is that it allows us to access logic and ideas beyond what our brains can instinctively do through its logical tools we are able to reach beyond our innate abilities and grasp more and more abstract concepts in the absorbing and exhilarating things to make and do in the fourth dimension parker sets out to convince his readers to revisit the very math that put them off the subject as fourteen year olds starting with the foundations of math familiar from school numbers geometry and algebra he reveals how it is possible to climb all the way up to the topology and to four dimensional shapes and from there to infinity and slightly beyond both playful and sophisticated things to make and do in the fourth dimension is filled with captivating games and puzzles a buffet of optional hands on activities that entices us to take pleasure in math that is normally only available to those studying at a university level things to make and do in the fourth dimension invites us to re learn much of what we missed in school and this time to be utterly enthralled by it
