File Management and Information Retrieval Systems 1993

the design and implementation of the maple system is an on going project of the symbolic computation group at the university of waterloo in ontario canada this manual corresponds with version v roman numeral five of the maple system the on line help subsystem can be invoked from within a maple session to view documentation on specific topics in particular the command updates points the user to documentation updates for each new version of maple the maple project was first conceived in the autumn of 1980 growing out of discussions on the state of symbolic computation at the university of waterloo the authors wish to acknowledge many fruitful discussions with colleagues at the university of waterloo particularly morven gen tleman michael malcolm and frank tompa it was recognized in these discussions that none of the locally available systems for symbolic computation provided the facilities that should be expected for symbolic computation in modern computing environments we concluded that since the basic design decisions for the then current symbolic systems such as altran camal reduce and to design a new system macsyma were based on 1960 s computing technology it would be wise from scratch taking advantage of the software engineering technology which had become available since then as well as drawing from the lessons of experience maple s basic features e g elementary data structures input output arithmetic with numbers and elementary simplification are coded in a systems programming language for efficiency

the design and implementation of the maple system is an on going project of the symbolic computation group at the university of waterloo in ontario canada this manual corresponds with version v roman numeral five of the maple system the on line help subsystem can be invoked from within a maple session to view documentation on specific topics in particular the command updates points the user to documentation updates for each new version of maple the maple project was first conceived in the autumn of 1980 growing out of discussions on the state of symbolic computation at the university of waterloo the authors wish to acknowledge many fruitful discussions with colleagues at the university of waterloo particularly morven gen tleman michael malcolm and frank tompa it was recognized in these discussions that none of the locally available systems for symbolic computation provided the facilities that should be expected for symbolic computation in modern computing environments we concluded that since the basic design decisions for the then current symbolic systems such as altran camal reduce and macsyma were based on 1960 s computing technology it would be wise to design a new system from scratch thus we could take advantage of the software engineering technology which had become available in recent years as well as drawing from the lessons of experience maple s basic features elementary data structures input output arithmetic with numbers and elementary simplification are coded in a systems programming language for efficiency

Maple V Library Reference Manual 2013-12-01

includes both ansi and traditional c

User's Manual for a HEC-2 Input File Preprocessor 1989

manual intended for use as a guide to the specifications of computer programmes available at the university of essex computing centre for the analysis of social sciences survey data includes descriptions of the data analysis programme the

data editing programme the magnetic tape listing programme and the data validation programme

User's Manual for Computer Program BASEPLOT 2002

this volume is the official reference manual for gnu bash the standard gnu command line interpreter

File Transfer Over the NBSNET: User's Manual 1984

this document describes the operation and structure of the fortran programs estk1d for and estk2d for these frequency domain wavenumber estimation programs implement either the bartlett or the high resolution capon 1969 maximum likelihood beamformers the program estk1d for forms a beam response based on a one dimensional observation wavenumber that is rotated through wavenumber space to determine the spatial bearing of a plane wave source estk2d for uses the beam response in two dimensional wavenumber space to estimate the two dimensional wavenumber vector of a plane wave source the discussion presented in this paper focuses on the operational details of installing and running estk1d and estk2d

C, a Reference Manual 1991

this report describes the icethk computer model that is used in conjunction with the hec 2 backwater model to simulate equilibrium ice jam profiles the icethk model fulfills an important need in studies that require the calculation of ice jam affected stage this report presents the theory and limitations of icethk and serves as a user s manual and concludes with a discussion of river ice modeling using icethk

Numerical Index of Standard and Recurring Air Force Publications 1992

clerical manual for local staff personnel for use with edit error listing produced by bureau of the census geography division s addedit I computer address editing program system

CFL3D User's Manual (Version 5.0) 1998

a brief narrative description of the journal article document or resource the volumes in this user manual document the data collection of the 1993 94 schools and staffing survey sass researchers who are ready to access the data file may go directly to the codebooks for each survey volumes ii and iii for the restricted use and public use versions respectively this manual focuses on survey documentation describing sass components and data collection and analysis the overall objective of the sass is to collect the information necessary for a complete picture of american elementary and secondary education the data collected permit detailed analyses of the characteristics of schools principals teachers and students and the linkage of sass components enables researchers to examine relationships among these elements of education the 1993 94 sass contained seven surveys consisting of a teacher supply and demand questionnaire questionnaires about principals schools teachers students library and media centers and media specialists and librarians the eighth component was the teacher followup survey this report explores survey design and implementation data collection including sampling edit procedures data imputation procedures weighting and aspects of data analysis including variance estimation and reinterview methodology seven appendixes to this volume present supplemental details about survey methodology contains 56 tables 124 appendix tables and 70 figures

UNIX System V, Release 4 1992

computers have become an essential component of modern biology they help to manage the vast and increasing amount of biological data and continue to play an integral role in the discovery of new biological relationships this in silico approach to biology has helped to reshape the modern biological sciences with the biological revolution now among us it is imperative that each scientist develop and hone today s bioinformatics skills if only at a rudimentary level bioinformatics methods and protocols was conceived as part of the methods in molecular biology series to meet this challenge and to provide the experienced user with useful tips and an up to date overview of current developments it builds upon the foundation that was provided in the two volume set published in 1994 entitled computer analysis of sequence data we divided bioinformatics methods and protocols into five parts including a thorough survey of the basic sequence analysis software packages that are available at most institutions as well as the design and implemen tion of an essential introductory bioinformatics course in addition we included sections describing specialized noncommercial software databases and other resources available as part of the world wide and a stimu ling discussion of some of the computational challenges biologists now face and likely future solutions

RENEW V3.2 User's Manual, Maintenance Estimation Simulation for Space Station Freedom Program 1993

the only book to address using cache to enhance and speed up application development developers use apache mysql memcached and perl to build dynamic sites that store information within the mysql database this is the only book to address using these technologies together to alleviate the database load in development covers each of the four systems and shows how to install set up and administer them then shows the reader how to put the parts together to start building applications explains the benefits of a base perl library for code re use and provides sample applications that demonstrate in a practical way the information covered in the previous chapters examines monitoring performance and security with a problem solving chapter that walks the reader through solving real world issues
