michael turner argues that the root causes of failures in american intelligence can be found in the way it is organized and in the intelligence process itself intelligence that has gone awry affects national decision making and ultimately american national security intelligence officials are reluctant to talk about intelligence successes claiming the secret of our success is the secret of our success but these officials also shy away from talking about failures largely

because doing so would expose the failings of american intelligence and have an impact on policy consumers who may become more reluctant to accept and act on the intelligence they receive rather than focusing on case studies the book takes a holistic approach beginning with structural issues and all dysfunctions that emanate from them turner explores each step of the intelligence cycle priority setting intelligence collection analysis production and dissemination to identify the inflection points within each stage that contribute to intelligence failures finally he examines a variety of plans that if implemented would reduce the likelihood of intelligence failures while examining the causes of intelligence failures turner also explores intelligence as a critical governmental activity making the book an excellent primer on secret intelligence turner writes in jargon free prose for the informed reader interested in foreign policy and national security policy matters and brings enough depth to his subject that even experts will find this a must read

labour s doorstep politics in london was first published in 1978 through participant observation and the analysis of part documents census reports and questionnaire data the author studied three local labour parties in different socio economic contexts bermondsey safe labour territory fulham a marginal district and south kensington hopeless conservative terrain associating himself with these parties for nine months he examined the impact of environment upon the political organizations and how each responded to the environmental challenge the study focuses upon organizational patters leadership roles the recruitment of members policy making at the local level and the political campaigns for a local election and a parliamentary election the author also analyses the outlooks of the activists on key issues carefully distinguishing between patterns that can be accepted with some confidence and those that are merely suggestive for future investigation the book raises such questions as what sort of people become involved in local party work what is he distribution of ideological enthusiasts what were the apparent motivations and aspirations of the party workers to what extent were the parties able to employ an inducement system in order to elicit assiduous effort from their activities the author examines some of the literature on incentive systems in voluntary organizations being based largely upon the american experience it is found to be inapplicable to ideological parties that seriously compete for power and fails to take account of the mixed motivations that one encounters in field research the opening chapters on this book are designed to acquaint the american reader with the organization and operation of the labour party at the local and national levels the treatment of the national party is from the vantage point of the local parties and the author has introduced some new materials pertaining to the national

organization scholars have long felt the need for grass roots studies of local parties in britain this book helps to fill that need

why our addiction to debt caused the global financial crisis and is the root of our financial woes adair turner became chairman of britain s financial services authority just as the global financial crisis struck in 2008 and he played a leading role in redesigning global financial regulation in this eye opening book he sets the record straight about what really caused the crisis it didn t happen because banks are too big to fail our addiction to private debt is to blame between debt and the devil challenges the belief that we need credit growth to fuel economic growth and that rising debt is okay as long as inflation remains low in fact most credit is not needed for economic growth but it drives real estate booms and busts and leads to financial crisis and depression turner explains why public policy needs to manage the growth and allocation of credit creation and why debt needs to be taxed as a form of economic pollution banks need far more capital real estate lending must be restricted and we need to tackle inequality and mitigate the relentless rise of real estate prices turner also debunks the big myth about fiat money the erroneous notion that printing money will lead to harmful inflation to escape the mess created by past policy errors we sometimes need to monetize government debt and finance fiscal deficits with

central bank money between debt and the devil shows why we need to reject the assumptions that private credit is essential to growth and fiat money is inevitably dangerous each has its advantages and each creates risks that public policy must consciously balance
