Three Pillars of Organization and Leadership  
in Disruptive Times 2019-09-28 this book  
written by an interdisciplinary team of  
authors explores the transformation of  
organizations in today s volatile uncertain  
and ambiguous vuca world it demonstrates the  
need to manage organizations in a dynamic way  
and to revisit and in some cases reinvent  
working and leadership styles that seemed  
appropriate during past decades and centuries  
in turn the book puts forward a model based on  
three distinct pillars of organization and  
leadership to suit disruptive times the  
concepts of sustainable purpose travelling  
organization and connecting resources these  
pillars challenge many of our traditional  
organizational patterns and meet the need for  
effective transformative approaches

an aesthetic and phenomenological account of  
feelings in this book tonino griffero

introduces and analyzes an ontological

category he terms quasi things these do not  
exist fully in the traditional sense as

substances or events yet they powerfully act  
on us and on our states of mind he offers an

original approach to the study of emotions  
regarding them not as inner states of the

subject but as atmospheres that is as powers  
poured out into the lived space we inhabit

griffero first outlines the general and

atmospheric characters of quasi things and

then considers examples such as pain shame the  
gaze and twilight which he argues is

responsible for penetrating and suggestive

moods precisely because of its vagueness with  
frequent examples from literature and everyday

life quasi things provides an accessible

aesthetic and phenomenological account of  
feelings based on the paradigm of atmospheres

the task of modern phenomenology is to

dissolve with the help of corrections and

additions the contrasts solidified in the bath  
of involuntary vital experience thus opening

up new horizons of questioning and workscape i

building and its display we can illuminate the  
individuality of each museum and the  
distinctive experience it offers for example  
how some museums create a sense of personal

didactic and how the visit in some cases is  
transformed into a spatial experience and in  
other cases into a more social event the book  
starts with an overview of the history of  
museum buildings and display strategies and a
